

Training Course SC-900: Microsoft Security, Compliance, and Identity Fundamentals

Overview: This course provides foundational level knowledge on security, compliance, and identity concepts and related cloud-based Microsoft solutions.

Duration: 1 Day.

Audience Profile: The target audience for this course is individuals who want to become familiar with the fundamentals of security, compliance and identity (SCI) in cloud-based and related Microsoft services. The content of this course is aligned with the objective profile of the SC-900 exam. Candidates should be familiar with Microsoft Azure and Microsoft 365 and understand how Microsoft security, compliance and identity solutions can span across these solution areas to provide a holistic end-to-end solution.

Certification: This course prepares you for the SC-900: Fundamentals of Security, Compliance and Identity exam.

Course Objectives: After completing this course, students will be able to:

- Describe basic concepts of security, compliance, and identity.
- Describe the concepts and capabilities of Microsoft identity and access management solutions.
- Describe the capabilities of Microsoft security solutions.
- Describe the compliance management capabilities in Microsoft.

Course Outline:

- 1- Describe the basic concepts of security, compliance, and identity.
 - Describe security and compliance concepts and methods.
 - Describe identity concepts.
- 2- Describe the concepts and functions of Microsoft Identity & Access Management solutions.
 - Describe the basic services and identity types of Azure AD.
 - Describe the authentication features of Azure AD.
 - Describe the access management features of Azure AD.
 - Identity protection and governance features of Azure AD.
- 3- Describe the features of Microsoft security solutions.
 - Describe the basic security features of Azure.
 - Describe the security management features of Azure.
 - Describe the security features of Microsoft Sentinel.
 - Describe the threat protection features of Microsoft 365.
 - Describe the security management features of Microsoft 365.
 - Endpoint Security with Microsoft Intune.

- 4- Describe the features of Microsoft compliance solutions.
- Describe the compliance management capabilities in Microsoft
 - Describe the information protection and governance features of Microsoft 365
 - Describe the insider risk features in Microsoft 365
 - Describe the eDiscovery and monitoring capabilities of Microsoft 365
 - Describe the resource governance capabilities in Azure
